

BH Program Descriptions/ACHC Reference Grid
REVISED – March 5, 2020

All programs accredited through ACHC using its Behavioral Health Standards Manual must meet the applicable standards in all seven Sections of the manual.

The chart below is meant to be a one-page reference guide identifying the applicable ACHC Behavioral Health Program Service type that corresponds to each of the program descriptions identified in the Behavioral Health Community-Based Program regulations (COMAR 10.63). Note that if a program is accredited only for a specific population it will only be licensed for that population.

Specific questions regarding applicability and/or interpretation of specific accreditation standards should be referred to ACHC.

BH Program Description 2018	ACHC Behavioral Health Program Service Types
Integrated Behavioral Health Programs	Outpatient Treatment (OTX)
Intensive Outpatient Treatment 2.1	Intensive Outpatient Treatment (IOTX)
