

Maryland Department of Health Maryland Primary Care Program Billing Reference Guide

January 2021 Edition

Introduction

The goal of this white paper is to provide guidance on the selection of billing codes to help primary care practices achieve the appropriate financial benefits of participation in the Maryland Primary Care Program (MDPCP) while highlighting the Medicare billing codes that are excluded for attributed beneficiaries. The MDPCP provides primary care providers financial incentives in the form of Care Management Fees (CMFs) that effectively replace the Medicare Chronic Care Management Fees (CCMs) that exist outside of the MDPCP. The MDPCP also provides for a Performance Based Incentive Payment and, for Track 2 practices, a Comprehensive Primary Care Payment (CPCP). The details regarding of each of these payments can be found in the Financial Methodology document posted on Connect.

The following document provides MDPCP practices with information on both current and newly approved billing codes that are permitted within the framework of the MDPCP. This document is intended to serve as a summary of the most relevant codes and is not meant to be a comprehensive billing guide. Even as Maryland has created a climate that promotes the movement from volume to value in the delivery of healthcare, so have many insurance payers. The following information highlights movement toward payment for non-face-to-face visits and for various delegated activities within the framework of team-based care.

The MDPCP is an unprecedented opportunity for primary care practices to participate in care transformation that supports the delivery of high quality, advanced primary care throughout the State of Maryland. The Program is focused on improving health outcomes and the overall experience of healthcare for patients and their caregivers, while controlling total healthcare costs. The MDPCP Program Management Office team hope that the information provide herein supports you in that work. Attached to this narrative is a detailed spreadsheet containing the following information: CPT/HCPC II level codes, full CPT/HCPC descriptions, check marks for which codes can be performed via Telemedicine, the required licensure of the rendering provider, and the associated reimbursements for Medicare, Medicaid and, where applicable, a crosswalk to the commercial payers, including Medicare Advantage plans. The codes are grouped into the following **ten** sections:

Business Consultants & Certified Public Accountants

American Institute of Certified Public Accountants
Maryland Association of Certified Public Accountants
AICPA Center for Audit Quality
AICPA Governmental Audit Quality Center
AICPA Employee Benefit Plan Audit Quality Center
**A Member of PrimeGlobal - An Association of
Independent Accounting Firms**

- 1. Wellness and Preventive Services:** This code section includes the Medicare benefits for Wellness Visits. There is an initial 'Welcome to Medicare' Wellness Visit (IPPE) which may be reported with a separately billable ECG, followed by initial and subsequent Annual Wellness Visits (AWV). These benefits are limited by timing and frequency. The IPPE is covered once in a beneficiary's lifetime within the first 12 months of Medicare Part B enrollment. The initial AWV is also a once in a lifetime benefit eligible 12 months following the IPPE. Subsequent AWV's are covered every 12 months thereafter. The purpose of these visits is to identify health and social risk factors by means of a review of medical and social histories, screening tests and risk assessments resulting in the referral of treatment and a written personal prevention plan. Depression screening and health risk assessment services that are separately covered by Medicare are not reported on the same day as the AWV. These visits do not include comprehensive routine physical exams (99391-99397). Routine physicals are not covered by Medicare but may be billed to supplementary insurance, Medicare Advantage plans, commercial payers or directly to the patient as their coverage allows. Many Medicare Advantage plans cover the Medicare wellness codes and the routine physicals separately. These codes may be reported on the same day as problem-oriented visits, if performed. Additional AWV billing guidance can be found at:

https://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNProducts/Downloads/AWV_Chart_ICN905706.pdf
<https://www.cdc.gov/policy/hst/HRA/FrameworkForHRA.pdf>

A complete interactive tool for all additional preventive services covered by Medicare can be found at:

<https://www.cms.gov/Medicare/Prevention/PrevntionGenInfo/medicare-preventive-services/MPS-QuickReferenceChart-1.html>

- 2. Transitional Care Management (TCM) Services:** This section includes the codes that are reported to obtain significant reimbursement for managing a patient's transition following discharge from an acute care facility. This includes an interactive contact and a face-to-face visit during the 30 day transition period. Acute care facilities include but are not limited to hospitals, rehabilitation facilities and skilled nursing facilities as the patient is being discharged back to the community setting, e.g., home, domiciliary care, rest home or assisted living. TCM benefits are based on timing and the sequence of services performed

AICPA Center for Audit Quality
AICPA Governmental Audit Quality Center
AICPA Employee Benefit Plan Audit Quality Center
**A Member of PrimeGlobal - An Association of
Independent Accounting Firms**

and documented. The provider or a clinical staff member must initiate the interactive contact (telephone, email or in person) with the patient or caregiver within two (2) business days following the discharge date. Medication reconciliation should be documented during that communication and/or an attempt made to reconcile medications. Reimbursement levels are based on the timing of the face-to-face visit and the level of medical decision-making. This service may be billed on the date of the face-to-face visit and need not wait until the end of the 30-day transition period. Only one provider may bill the service per patient, and it is excluded from a surgeon's postoperative care (all surgical patients should be followed by their primary care provider). Do not bill for home health care plan oversight during this time period as it will cause the TCM care to deny as "duplicative." Clinical staff under the direction of the provider may furnish additional non-face-to-face services such as:

- Communicate with agencies and community services the beneficiary uses
- Provide education to the beneficiary, family, guardian, and/or caretaker to support self-management, independent living, and activities of daily living
- Assess and support treatment adherence and medication management
- Identify available community and health resources
- Assist the beneficiary and family in accessing needed care and services

A complete guide to documentation and billing for transitional care service can be found at:

<https://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNProducts/Downloads/Transitional-Care-Management-Services-Fact-Sheet-ICN908628.pdf>

- 3. Complex and Noncomplex Chronic Care Management (CCM):** This section contains the codes that are **excluded** from reporting to Medicare while enrolled in the MDPCP program. However, they are billable to Medicare Advantage and commercial payers. They are not covered under the Maryland Medicaid program. These codes provide reimbursement for non-face-to-face time spent by clinical staff and/or physicians and Qualified Healthcare Provider (QHP) for managing the care of patients with two or more chronic conditions. These conditions are expected to last at least 12 months and place the patient at significant risk of death, acute exacerbation/decompensation or functional decline. The work includes establishing, implementing, revising or monitoring a comprehensive care plan. The benefit is based on the amount of time accumulated during a calendar month spent on the CCM activities for the patient. The levels of reimbursement correspond to the amount of time spent and the level of complexity of medical decision making. Examples of chronic conditions include but are not limited to the following:

- Alzheimer's disease and related dementia

ROSEN, SAPPERSTEIN & FRIEDLANDER, LLC

405 York Road, Towson, MD 21204 • Phone: 410.581.0800 • Fax: 410.581.2268 • Email: info@rsandf.com • www.rsandf.com

BALTIMORE • ANNAPOLIS • COLUMBIA • DELRAY BEACH (FL)

Business Consultants & Certified Public Accountants

American Institute of Certified Public Accountants
Maryland Association of Certified Public Accountants
AICPA Center for Audit Quality
AICPA Governmental Audit Quality Center
AICPA Employee Benefit Plan Audit Quality Center
**A Member of PrimeGlobal - An Association of
Independent Accounting Firms**

- Arthritis (osteoarthritis and rheumatoid)
- Asthma
- Atrial fibrillation
- Autism spectrum disorders
- Cancer Cardiovascular Disease
- Chronic Obstructive Pulmonary Disease
- Depression
- Diabetes
- Hypertension
- Infectious disease
- Substance abuse

CCM services include INR management, self-management education, telephone assessment and management discussions and other patient care supervision that is often not separately reimbursable. Do not report CCM services in the same calendar month as TCM services. Patient consent is required for billing including informing the patient that only one practitioner can furnish and be paid for the service. Obtaining the patient's signature to consent to the plan of care increases patient compliance.

Effective January 1, 2021, there are revisions to the current coding nomenclature for these codes that specify the time range associated with the codes and clarify that these services may now be performed by clinical staff directed by the physician or QHP. New codes were added to report extended time spent in chronic care management during the calendar month.

A complete guide to CCM services and additional resources can be found at:

<https://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNProducts/Downloads/ChronicCareManagement.pdf>

CareFirst provides significant reimbursement and support to providers in Patient Centered Medical Homes (PCMH) who activate an eligible patient's care plan through the CareFirst Provider Portal. Additional CareFirst PCMH details can be found at:

<https://provider.carefirst.com/carefirst-resources/provider/pdf/pcmh-care-plan-development-pcm1028.pdf>

4. **Behavioral Health Intervention/Assessment:** This section includes the codes that are used to describe services that are intended to assess factors that may affect the recovery or progression of a diagnosed physical health problem or illness. These procedures identify

AICPA Governmental Audit Quality Center
AICPA Employee Benefit Plan Audit Quality Center
**A Member of PrimeGlobal - An Association of
Independent Accounting Firms**

the psychological and social factors that influence the patient's physical health problem. The focus is not mental health and should not be reported if the patient has a mental health diagnosis. These services are payable under Medicare to a clinical psychologist. These codes are not to be used by physicians, non-physician providers (NPP) or clinical social workers. Physicians and NPPs should report this type of service with evaluation and management (E/M) codes. January 1, 2020 CPT added an entire set of new codes to report these services and has deleted codes 96150-96154. The new code set has changed the time references for coding these services. The health behavior assessment service is no longer time based (CPT 96156). The health behavior intervention services now have an initial base time of 30 minutes with an add-on code for each additional 15 minutes. And, two additional codes were added to report health behavior intervention services provided to a family. Furthermore, CPT did not designate that the code set effective January 1, 2020 was a telemedicine eligible code and CMS did not include the new code set to their list of covered telemedicine codes for 2020 which was published in 2019. As of March 30, 2020 CMS has added these services to the list of expanded telehealth eligible service in the wake of the COVID-19 emergency.

Additional information regarding these codes can be found at:

https://downloads.cms.gov/medicare-coverage-database/lcd_attachments/30514_1/l30514_031610_cbg.pdf

5. **Chronic Care Remote Patient Monitoring (RPM)** – This section includes the codes that are used to report non-face-to-face evaluation and management services and health data monitoring. Medicare now covers a 'virtual check-in' which can be a telephone call. Because these services are inherently non face-to-face they are not classified as telehealth services. G2012 is reported to obtain reimbursement for a telephone call to evaluate and manage a patient's condition(s) in lieu of an office visit. G2010 is reported to obtain reimbursement for evaluation of recorded video and/or still images submitted by an established patient (i.e., store and forward), including interpretation and follow-up with the patient. Both codes are payable when the service does not arise from a face-to-face visit in the last 7 days or results in the need to schedule an office visit at the soonest availability.

There are four (4) additional codes for reimbursement when a physician or other QHP orders an FDA-defined remote patient monitoring (RPM) device that is used by a patient for the purposes of collecting, monitoring, and reporting health-related data to the provider, including, but not limited to, weight, blood pressure, or pulse oximetry. This technology allows for the gathering of health data from the patient in one location and the electronic transmission of that data to a provider in a different location for review and subsequent recommendations,

AICPA Governmental Audit Quality Center
AICPA Employee Benefit Plan Audit Quality Center
**A Member of PrimeGlobal - An Association of
Independent Accounting Firms**

particularly for patients with ongoing and/or chronic disease processes. Code 99453 reports the work involved in orienting the patient to the RPM process, the initial device set-up, and the patient instruction and training for each episode of care. An episode of care is described as starting at the time the RPM device service begins and is complete when the established treatment goal has been reached. Code 99454 reports the supply of the actual device, including the daily recordings and program alert transmissions for a 30-day period. These codes should not be reported for monitoring if the duration is less than 16 days. Code 99457 is reported to identify time spent managing care when the patient or the practice does not meet requirements for reporting a more specific service. This code may be reported simultaneously with chronic care management, transitional care management, and behavioral health integration services. Time involved in performing this service should remain separate and distinct from other services and does not count toward the required time for both services in a single month. Live and interactive communication with the patient and/or caregiver is required with 20 minutes or more of clinician time per calendar month. Code 99457 should be reported only once per calendar month regardless of the number of physiologic monitoring modalities performed. Effective January 1, 2020 CPT revised the definition of 99457 to report the first 20 minutes of the service and added the CPT code 99458 to report each additional 20 minutes to obtain reimbursement for extended times. CPT also added codes 99473 and 99474 to report monitoring patients' self measured blood pressure. Codes 99473 and 99474 are bundled into chronic care management services and can only be reported separately.

Effective January 1, 2021, Medicare has qualified that clinical staff may perform and document these services (CPT 99453 and 99454) under the direction of a physician or QHP. Effective January 1, 2021 Medicare will accept code G2252 to report a "virtual check-in" extending to a duration of 11-20 minutes. Additional discussion of these codes can be found at:

<https://www.foley.com/en/insights/publications/2018/11/medicareremote-patient-monitoring-reimbursement-fa>

- 6. Advance Care Planning (ACP):** This section includes the codes that provide reimbursement for time spent discussing advance directives with a patient, family member, or surrogate with or without completing relevant forms. This is a face-to-face visit with a physician or QHP. ACP may include discussion of goals and preferences for care, complex medical decision-making regarding life-threatening or life-limiting illness, explanation of relevant advance directives, including (but NOT requiring) completion of advance directives. An advance directive is a document in which a patient appoints an agent and/or records the wishes of a patient pertaining to their medical treatment at a future time if they cannot decide for themselves. This service is not limited to frequency as over time, directives may change or there is a need to engaging family members, and/or surrogate decision makers, as clinical situations arise. The level of benefit is based on the amount of time spent in

discussion which should be separately documented. A minimum of 16 minutes must be documented to bill for the first 30 minutes. A minimum of 46 minutes must be documented to bill for an additional 30 minutes. Time may be documented as start and stop time or the total duration. This service may be reported on the same day as the AWW and when covered on that day there is no cost sharing to the patient. If the service is reported alone or on the same day as an E/M service, the patient should be informed that cost sharing will apply. Additional details may be found at:

<https://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNProducts/Downloads/AdvanceCarePlanning.pdf>

- 7. Behavioral Health Integration (BHI) Services:** This section includes the three (3) codes that provides separate reimbursement to physicians and NPPs for the BHI services they furnish to beneficiaries over a calendar month service period. There are two (2) models of care under which these services are provided. The first is the Psychiatric Collaborative Care Model (CoCM). Psychiatric collaborative care management services describe care reported by a qualified clinician overseeing a behavioral health care manager and psychiatric consultant who provides a behavioral health assessment, including establishing, starting, revising, or monitoring a plan of care as well as providing brief interventions to a patient diagnosed with a mental health disorder. The psychiatric consultant contracts directly with the qualified clinician to render the consultation portion of the service. Patients are generally referred to a behavioral health care manager for assistance in receiving treatment for newly diagnosed conditions that have been unresponsive to traditional or standard care provided in a non-psychiatric environment or who need additional examination and evaluation before a referral to a psychiatric care setting. In 99492, the required elements include outreach and engagement, initial patient assessment that involves the administration of a validated rating scale, development of an individual patient care plan, psychiatric consultant review and modifications as needed, input of patient data into a registry and tracking of patient progress and follow up and provision of brief interventions using evidence-based techniques. In 99493, the required elements include tracking patient follow-up and progress via registry, weekly caseload participation with a psychiatric consultant, working together and coordinating with the qualified clinician on a regular basis, additional ongoing review of the patient's progress and recommendations for treatment changes, including medications with the psychiatric consultant, provision of brief interventions with the use of evidence-based techniques, monitoring patient outcomes using validated rating scales and relapse prevention planning. Episodes of care begin when the patient is first directed to the behavioral health care manager and ends when the treatment goals have been reached or the goals were not reached and the

**A Member of PrimeGlobal - An Association of
Independent Accounting Firms**

patient was referred to another provider for ongoing treatment, or no psychiatric collaborative care management was provided for a period of six consecutive months. These codes do not differentiate between new or established patient status. Report 99492 for 70 minutes of initial psychiatric collaborative care management in the first month; 99493 for 60 minutes of care in a subsequent month; and 99494 for each additional 30 minutes of initial or subsequent care in a calendar month.

General behavioral health integration care management services (99484) are provided face-to-face by clinical staff under the direct supervision of a qualified clinician, to a patient with a diagnosed health care condition including substance abuse issues requiring care management services for a minimum of 20 minutes per month. Specific elements of a treatment plan must be provided and documented, including an initial assessment or follow-up monitoring involving the use of validated rating scales, behavioral health care planning relating to the patient's behavioral or mental health problems with revisions in cases where a patient is not responding to treatment or has a status change, organizing and coordinating all aspects of the patient's mental health care such as therapy, medications, counseling and/or psychiatric consultations and continuing ongoing care in conjunction with a designated care team member. The clinician does not need to provide a comprehensive assessment and treatment plan nor is it required to have all chronic care management functions documented. The patient may receive these services in any outpatient setting once certain criteria are established, namely that the clinician maintains a relationship with the patient and clinical staff and that the clinical staff be available to provide the patient with face-to-face services.

- 8. Screening and Brief Intervention for Referral to Treatment (SBIRT):** This section includes codes reimbursed by Medicare, Medicaid and commercial payers for changing behavior related to substance abuse. SBIRT services are counseling and/or intervention services directed at high-risk behaviors such as alcohol, and substance abuse (tobacco is not included in this section). These services can be reported as treatment of the condition or in relation to the condition that has the potential of causing illness or injury. Additionally, substance abuse screenings, utilizing instruments such as AUDIT and DAST, are used to determine the patient's opinion related to behavior change and provide input on a plan to change behavior with appropriate actions and motivation. These are time-based codes and time spent with the patient must be documented in the medical record separately from time spent performing an E/M service. When documentation supports that a significant, separately identifiable problem-oriented evaluation and management (E/M) service is

Independent Accounting Firms**

rendered, the appropriate code for the E/M service may be reported separately. An intervention is performed when indicated by the score with the nature of the intervention recorded. If an intervention is not required on the basis of screening results, the survey may be reported with code 96160 or 96161 or the Medicare alcohol screening code G0442. There are additional resources at:

https://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNProducts/Downloads/SBIRT_Factsheet_ICN904084.pdf

For CY 2020, Medicare is proposing to add the following codes to the list of telehealth services: HCPCS codes GYYY1, GYYY2, and GYYY3, which describe a bundled episode of care for treatment of opioid use disorders (OUD). These codes were developed as G2086, G2087 and G2088. CMS finalized the creation of new coding and payment for a monthly bundle of services for the treatment of OUD that includes: overall management, care coordination, individual and group psychotherapy, substance use counseling. They have been added to section 8 of the attached Billing Reference Guide.

9. **Miscellaneous Health Intervention Services:** This section contains miscellaneous CPT and HCPCII codes available for additional wellness services and behavioral screening and intervention services payable under Medicare, Medicaid and commercial payers. This section includes codes for smoking cessation, high risk behavior counseling and screening services that are separately reportable when not included in another service, e.g., depression screening or routine alcohol screening with a negative result.

10. **Office and Outpatient Department Evaluation and Management (E/M) Services:** Effective January 1, 2021, major revisions have been made to this code set beginning with the deletion of CPT code 99201. A sheet has been added to the attached Coding Reference Guide containing the revised descriptions and 2021 Medicare fees. Effective January 1, 2021, CMS is implementing the new coding, introductory language, and interpretive guidance framework that the American Medical Association Current Procedural Terminology Editorial Panel issued for office/outpatient E/M visits. Under this new CPT coding framework, history and exam will no longer be used to select the level of code for office/outpatient E/M visits. Instead, an office/outpatient E/M visit will include a medically appropriate history and exam, when performed. The clinically outdated system for number of body systems/areas reviewed and examined under history and review will no longer apply, and the history and exam components will be performed when they are reasonable and necessary, and clinically appropriate. CPT code 99417 will not be valid for Medicare purposes and has been replaced by HCPC code G2212 to report extended time. For further

guidance on these revisions, please see <https://www.ama-assn.org/practice-management/cpt/cpt-evaluation-andmanagement>. Included in the year end legislation that increased the 2021 budget for the Medicare Physicians Fee Schedule by raising the national conversion factor from \$32.40 to \$34.89, the decision was made to delay implementation of reimbursement for G2211 for 3 years.

Additional guidance on this code and other CMS policy changes for calendar year 2021 may be found at <https://www.cms.gov/files/document/mm12071.pdf>

Telehealth/Telemedicine Medical Services: Telehealth services are described as the delivery of healthcare services normally provided in a face-to-face setting through the use of real-time, interactive two-way communication technology for the purpose of diagnosis, consultation, and/or treatment of a patient in a location separate from the servicing provider. Telehealth services do not include the use of audio-only telephone, facsimile machine, texting, or electronic mail. Telehealth services include a wide range of evaluation and management services, annual wellness visits, subsequent inpatient care, and psychotherapy and substance abuse treatments. Telehealth services are used to support health care when the provider and the patient are physically separated. Typically, the patient communicates with the telehealth provider via interactive means that are sufficient to establish the necessary link to the telehealth provider who is working at a different location (“distant site”) from the patient. Telehealth includes a wide range of services including but not limited to office visits, consultations, inpatient follow up care, nursing home visits and some health risk assessments including AWV and SBIRT services. Because Medicare already covered certain services that are inherently performed by remote communications such as chronic care management, the virtual check-in (brief telephone communication) and asynchronous services e.g., store and forward technology, those services are not considered telemedicine services for discussion in this section. However, coding for telephone calls and telephone audio only services are included in the attached coding guide.

****** Due to the COVID-19 Emergency Declaration sweeping changes have been made to expand access to telehealth services. Medicare will reimburse eligible telehealth services under new relaxed HIPAA waivers and sites of origination of services.**

- Where prior to Covid-19 services had to be furnished via HIPAA compliant synchronous telecommunication devices to report face to face services – those services can be performed via a non-public facing remote communication produce commonly available on smart phones such as Apple Facetime, Google G-Suites, Zoom and Skype for Business
- Where prior to Covid-19 the individual receiving the service had to be located in a health shortage area, individuals are now eligible to receive telehealth services in the location of their home regardless of geographic location.

The list of Telehealth services has been greatly expanded to include initial hospital care days, home visits and rest home visits as well as additional therapy services. A complete list can be found at:

<https://www.cms.gov/Medicare/Medicare-General-Information/Telehealth/Telehealth-Codes>

Telehealth practitioners payable under Medicare include:

- Physicians
- Nurse practitioners (NPs)
- Physician assistants (PAs)
- Nurse-midwives
- Clinical nurse specialists (CNSs)
- Clinical psychologists (CPs) and clinical social workers (CSWs)
- Registered dietitians or nutrition professional

Commercial payers reimburse telehealth services per individual payer policies and they also have made sweeping changes to their policies during the state of emergency. Additional guidance on Maryland payers has been included in the Coding Resource Guide. CPT indicates all codes designated as Telemedicine with the preceding star symbol. A complete list of those CPT codes is located in Appendix P under the title CPT Codes That May Be Used For Synchronous Telemedicine Services". All codes that are listed in the attached spreadsheets with a check mark in Telehealth eligible column may be reported as a telehealth service. Medicare publishes an additional list which includes CPT and level 2 HCPC codes that are covered when the appropriate criteria are met. The most recent publication of this list, expanded due to the state of emergency as also been added to the coding guide. Medicare reimburses a telehealth service at the non-facility fee schedule which is the same rate as the face-to-face service unless the provider assigns payment to a CAH. Medicare has waved the prior limitation to the number of telemedicine services eligible for payment during the year due to the state of emergency. Medicare has eliminated the use of the telemedicine modifier and the service is identified as

telehealth by the POS code (02). Physician offices in an eligible area may bill the originating site facility fee with HCPC code Q3014 with POS 11. Commercial payers issue other specific guidance relative to reporting a telehealth service by appending the appropriate (95, GQ, GT or GO as determined by the payer) and by reporting a place of service (POS) code 02 – Telehealth.

Additional Medicare billing and payment guidance including a list of telemedicine procedure codes can be found at:

<https://www.novitas-solutions.com/webcenter/portal/MedicareJH/pagebyid?contentId=00027460>

<https://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNMattersArticles/Downloads/MM10883.pdf>

Due to wide availability and advances in technology, telemedicine has emerged as a critical health care component that is viewed by many payers as a tool to improve patients' access to timely and cost-effective care. Mandates to health plans governing provision of telemedicine under MD state law are:

- Requires coverage for health services “appropriately” delivered through telemedicine.
- Prohibits an insurer from excluding coverage solely because it is provided through telemedicine and not provided through an in-person consultation or contact between a provider and a patient.
- Prohibits distinguishing between patients in rural or urban locations in providing coverage for services through telemedicine.
- Does not require coverage of telemedicine if the decision is based on a finding that telemedicine is not medically necessary, appropriate, or efficient

Many large health insurers, including CareFirst, provide the software and education to connect their subscribers to their providers care via interactive telecommunication (Video Visits). More information about the CareFirst Telemedicine Program that is available at no charge to PCPs in PCMH practices can be found at:

<https://provider.carefirst.com/providers/care-management/telemedicine.page>

ADDITIONAL UPDATES RELATED TO CMS FLEXIBILITIES TO FIGHT COVID-19

Medicare Telehealth

Care providers may conduct a telehealth visit from any private, secure location that will support member privacy.

The use of telehealth does not change the out of pocket costs for beneficiaries with Original Medicare. Beneficiaries are generally liable for their deductible and coinsurance; however, the HHS Office of Inspector General (OIG) is providing flexibility for healthcare providers to reduce or waive cost-sharing for telehealth visits paid by federal healthcare programs.

Beneficiary consent should not interfere with the provision of telehealth services. Annual consent may be obtained at the same time, and not necessarily before, the time that services are furnished.

Remote Patient Monitoring – See Section 4

- Clinicians can provide remote patient monitoring services to both new and established patients. These services can be provided for both acute and chronic conditions and can now be provided for patients with only one disease. For example, remote patient monitoring can be used to monitor a patient's oxygen saturation levels using pulse oximetry. (CPT codes 99091, 99457-99458, 99473- 99474, 99493-99494)

Removal of Frequency Limitations on Medicare Telehealth

To better serve the patient population that would otherwise not have access to clinically appropriate in-person treatment, the following services no longer have limitations on the number of times they can be provided by Medicare telehealth:

- A subsequent inpatient visit can be furnished via Medicare telehealth, without the limitation that the telehealth visit is once every three days (CPT codes 99231-99233);
 - A subsequent skilled nursing facility visit can be furnished via Medicare telehealth, without the limitation that the telehealth visit is once every 30 days (CPT codes 99307-99310)

Workforce

- ***Medicare Physician Supervision requirements:*** For services requiring direct supervision by the physician or other practitioner, that physician supervision can be provided virtually using real-time audio/video technology.
