

LTSSMaryland Monthly Spotlight

August 7

Welcome to the latest newsletter! Your guide to new functionalities, upcoming upgrades, and bug fixes.

There are no major LTSSMaryland or Provider Portal updates scheduled for the upcoming maintenance period at this time.

Other Updates

Select minor enhancements and bug fixes in LTSSMaryland

- Corrected an issue where DDA Regional Office (RO) Directors, RO Provider Relations Directors and RO Provider Relations staff were able to edit the “Allow Login” field when creating LTSSMaryland user profiles. Now “Allow Login” in LTSS will be restricted to only LTSS Helpdesk users.
- Corrected an issue where the Overall Decision Form (ODF) date for one DDA participant was inadvertently set years in the future, preventing their Person Centered Plan (PCP) from being approved.
- Corrected an issue where the system would incorrectly pre-populate the ‘Residential’ field with “no” within the Pre-ATP Questionnaire section of the DDA ATP form.
- Corrected an issue causing an invalid Self-Direction PCP error resulting from an incorrect service ID being applied from a copied or revised PCP of a differing program type.
- Corrected an issue where a REM client had multiple in-progress Case Management Plans.
- Corrected a defect where the Plan of Service (POS) max weeks allowed was not updating when using temporary service lines.
- Corrected an issue that prevented users from clicking the “Submit” button on some Provisional Plans of Service.
- Corrected an issue that allowed users to enter invalid characters into the “Event Time” field of the Reportable Event Form.
- Corrected an issue that was causing MDC provider agency staff to not display when completing MDC provider staff assignments.
- Corrected an issue preventing sorting of columns in the new “Current Assignments Report”.

Select minor enhancements and bug fixes in Provider Portal

- Corrected an issue that prevented the ‘Invoice Number’ within the DDA State Payment Report from generating for all providers.
- Corrected an issue that was bringing some services out of “Not Authorized” status and putting them in a “Needs Authorization” status when a provider or MDH would submit a new service.

LTSSMaryland's Mission

“To provide an online solution to coordinating Medicaid Home and Community-Based Services across programs.”

August Maintenance Window

Friday, August 6 9:00 pm
to
Saturday, August 7 7:00 am
(10 hours)
