Drug-Induced Death Rate	
SHIP website	This indicator shows the drug-induced death rate per 100,000 population. Drug-
description	induced deaths include all deaths for which illicit or prescription drugs are the
	underlying cause. In 2007, drug- induced deaths were more common than alcohol
	induced or firearm-related deaths in the United States. In 2010, there were 761
	drug induced deaths in Maryland.
