

MARYLAND
Department of Health

Public Health Preparedness and Situational Awareness Report: #2021:17

Reporting for the week ending 05/01/21 (MMWR Week #17)

May 7th, 2021

CURRENT HOMELAND SECURITY THREAT LEVELS

National: No Active Alerts

Maryland: **ENHANCED** (MEMA status)

SYNDROMIC SURVEILLANCE REPORTS

ESSENCE (Electronic Surveillance System for the Early Notification of Community-based Epidemics): Graphical representation is provided for all syndromes (excluding the “Other” category; see Appendix 1) by Health and Medical Regions (See Appendix 2). Emergency department chief complaint data is presented as rates per 100,000 residents using data from the 2010 census. Electronic Surveillance System for the Early Notification of Community-Based Epidemics (ESSENCE). Baltimore, MD: Maryland Department of Health; 2021.

(report continues on next page)

Gastrointestinal Syndrome

There were no Gastrointestinal Syndrome outbreaks reported this week.

Gastrointestinal Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	13.13	14.73	15.82	10.05	12.89
Median Rate*	13.11	14.61	15.46	10.00	12.83

* Per 100,000 Residents

(report continues on next page)

Respiratory Syndrome

There were seventy-eight (78) Respiratory Syndrome outbreaks reported this week: Ten (10) outbreaks of COVID-19 in Assisted Living Facilities (Regions 3,4,5), one (1) outbreak of COVID-19 in a Correctional Facility (Regions 1&2), ten (10) outbreaks of COVID-19 in Daycare Facilities (Regions 1&2,3,4,5), five (5) outbreaks of COVID-19 in Group Homes (Regions 1&2,3,4), five (5) outbreaks of COVID-19 in Hospitals (Region 3), nine (9) outbreaks of COVID-19 in Nursing Homes (Regions 1&2,3,4,5), one (1) outbreak of COVID-19 in a Residential Treatment Center for Children (Region 5), twenty-one (21) outbreaks of COVID-19 in Schools (Regions 1&2,3,4,5), five (5) outbreaks of COVID-19 in Substance Use Treatment Programs (Region 3), one (1) outbreak of COVID-19 in a Transitional Housing Facility (Region 3), five (5) outbreaks of COVID-19 in Workplaces (Region 3,4,5) and one (1) outbreak of COVID-19 in a Youth Sports Team (Region 5)

Respiratory Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	12.44	14.69	15.21	9.90	12.71
Median Rate*	12.10	14.03	14.35	9.47	12.15

* Per 100,000 Residents

(report continues on next page)

Fever Syndrome

There were no Fever Syndrome outbreaks reported this week.

Fever Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	3.03	3.87	4.10	2.99	3.48
Median Rate*	2.82	3.73	3.97	2.88	3.35

*Per 100,000 Residents

(report continues on next page)

Localized Lesion Syndrome

There were no Localized Lesion Syndrome outbreaks reported this week.

Localized Lesion Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.15	1.67	1.95	0.86	1.34
Median Rate*	1.01	1.64	1.77	0.83	1.29

* Per 100,000 Residents

(report continues on next page)

Rash Syndrome

There were no Rash Syndrome outbreak reported this week.

Rash Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.18	1.56	1.65	0.91	1.28
Median Rate*	1.01	1.53	1.55	0.87	1.25

* Per 100,000 Residents

(report continues on next page)

Neurological Syndrome

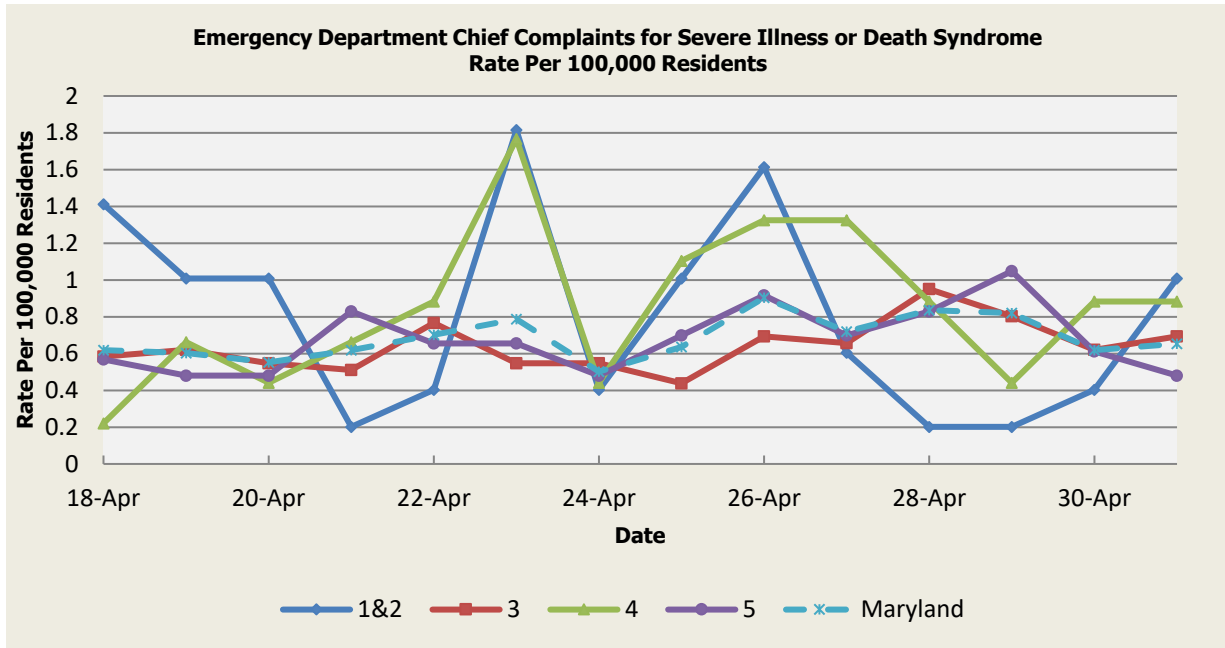

There were no Neurological Syndrome outbreaks reported this week.

Neurological Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.83	1.02	0.95	0.66	0.86
Median Rate*	0.81	0.99	0.88	0.61	0.84

* Per 100,000 Residents

(report continues on next page)

Severe Illness or Death Syndrome

There were no Severe Illness or Death Syndrome outbreaks reported this week.

Severe Illness or Death Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.66	0.87	0.85	0.55	0.73
Median Rate*	0.60	0.84	0.88	0.52	0.70

* Per 100,000 Residents

(report continues on next page)

SYNDROMES RELATED TO CATEGORY A AGENTS

Botulism-like Syndrome

There was an appreciable increase above baseline in the rate of ED visits for Botulism-like Syndrome on 4/18 (Region 4), 4/19 (Regions 1&2,3,4,5), 4/20 (Regions 1&2), 4/21 (Regions 1&2), 4/22 (Region 4), 4/23 (Region 4), 4/24 (Regions 1&2,4), 4/25 (Region 4), 4/26 (Regions 1&2,4,5), 4/27 (Region 5), 4/28 (Regions 4,5), 4/29 (Regions 1&2), 4/30 (Regions 4,5), 5/1 (Regions 1&2). These increases are not known to be associated with any outbreaks.

Botulism-like Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.08	0.14	0.07	0.09	0.11
Median Rate*	0.00	0.11	0.00	0.09	0.10

* Per 100,000 Residents

(report continues on next page)

Hemorrhagic Illness Syndrome

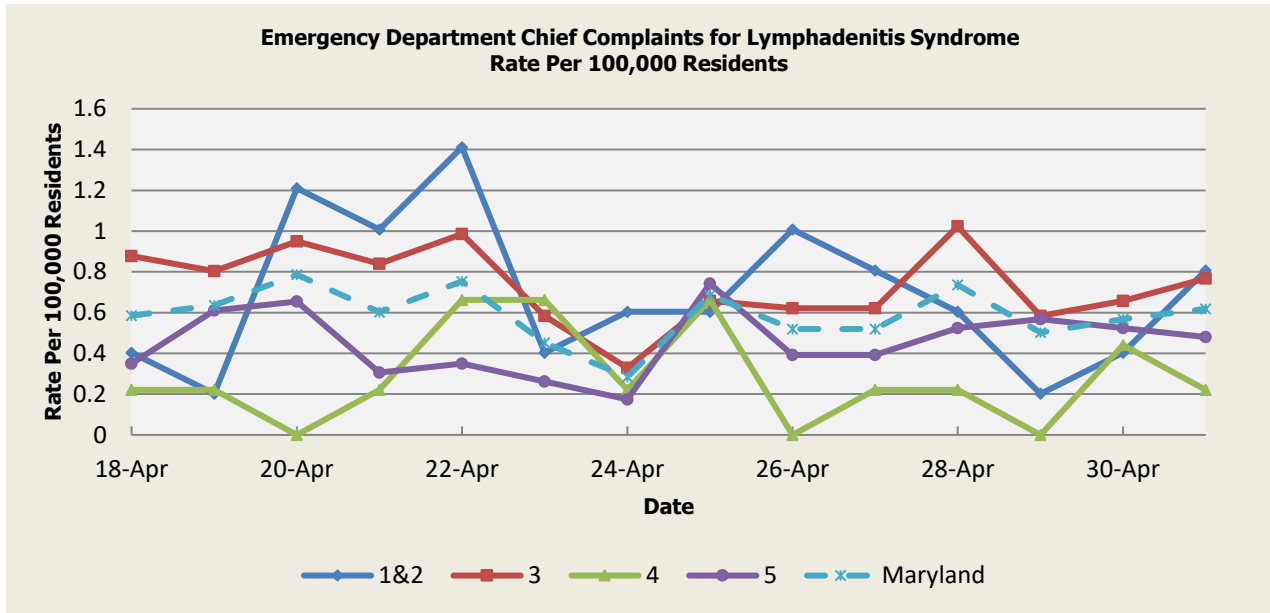

There was an appreciable increase above baseline in the rate of ED visits for Hemorrhagic Illness Syndrome on 4/18 (Regions 1&2), 4/25 (Regions 1&2), 4/30 (Regions 1&2). These increases are not known to be associated with any outbreaks.

Hemorrhagic Illness Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.05	0.17	0.04	0.15	0.14
Median Rate*	0.00	0.11	0.00	0.09	0.12

* Per 100,000 Residents

(report continues on next page)

Lymphadenitis Syndrome

There was an appreciable increase above baseline in the rate of ED visits for Lymphadenitis Syndrome on 4/20 (Regions 1&2), 4/21 (Regions 1&2), 4/22 (Regions 1&2), 4/26 (Regions 1&2), 4/27 (Regions 1&2), 5/1 (Regions 1&2). These increases are not known to be associated with any outbreaks.

Lymphadenitis Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.40	0.61	0.41	0.40	0.50
Median Rate*	0.40	0.55	0.44	0.35	0.47

* Per 100,000 Residents

MARYLAND REPORTABLE DISEASE SURVEILLANCE

Coronavirus Disease 2019 (COVID-19) Situation Summary

On March 5th, 2020, the Maryland Department of Health announced the first cases of coronavirus disease 2019 (abbreviated COVID-19) in the State of Maryland.

Confirmed COVID-19 Case Counts in Maryland by County (As of May 7th, 2021)

County	Number of Confirmed Cases
Allegany	6,884
Anne Arundel	42,956
Baltimore City	51,743
Baltimore County	64,325
Calvert	4,175
Caroline	2,275
Carroll	9,246
Cecil	6,141
Charles	10,642
Dorchester	2,736
Frederick	19,540
Garrett	1,996
Harford	16,245
Howard	19,010
Kent	1,325
Montgomery	70,154
Prince George's	83,714
Queen Anne's	2,949
Somerset	2,548
St. Mary's	5,901
Talbot	2,099
Washington	14,321
Wicomico	7,517
Worcester	3,593
Total	452,035

The most up-to-date information may be found on the Maryland Department of Health website at <https://coronavirus.maryland.gov>.

(report continues on next page)

SYNDROMIC INFLUENZA SURVEILLANCE

Seasonal Influenza reporting occurs from MMWR Week 40 through MMWR Week 20 (October 2020 through May 2021). Due to the COVID-19 pandemic, influenza reporting will be extended to the beginning of the 2021-2022 reporting season (MMWR Week 40/Week Ending October 9, 2021).

Seasonal Influenza activity for Week 17 was: Minimal

Influenza-like Illness

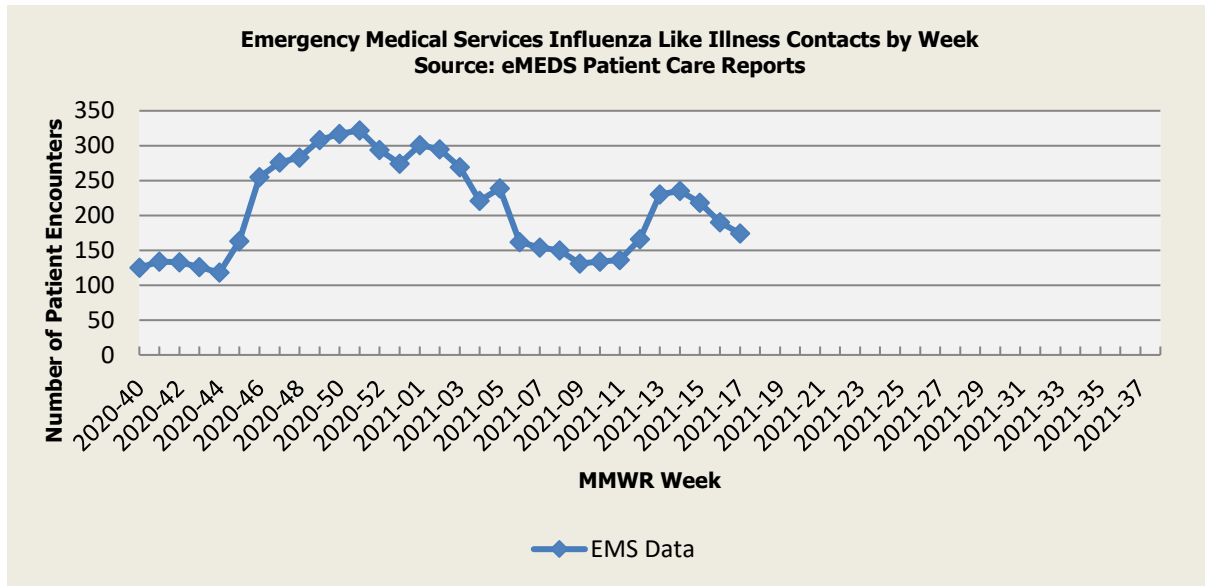

Influenza-like Illness Baseline Data Week 1 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	10.04	13.89	13.20	11.59	12.64
Median Rate*	7.26	10.19	9.27	8.43	9.17

* Per 100,000 Residents

(report continues on next page)

Influenza-like Illness Contacts by Week

Disclaimer on eMEDS flu related data: These data are based on EMS Pre-hospital care reports where the EMS provider has selected “flu like illness” as a primary or secondary impression of a patient’s illness. This impression is solely based on the signs and symptoms seen by the provider, not on any diagnostic tests. Since these numbers do not include all primary or secondary impressions that may be seen with influenza the actual numbers may be low. These data are reported for trending purposes only.

(report continues on next page)

Over-the-Counter Influenza-Related Medication Sales

There was no appreciable increase above baseline in the rate of OTC Medication Sales during this reporting period.

OTC Medication Sales Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	3.18	4.04	2.48	7.33	5.11
Median Rate*	2.42	3.03	2.21	6.37	4.25

* Per 100,000 Residents

(report continues on next page)

Over-the-Counter Thermometer Sales

There was no appreciable increase above baseline in the rate of OTC Thermometer Sales during this reporting period.

Thermometer Sales Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	2.64	2.50	2.05	3.31	2.79
Median Rate*	2.42	2.45	1.99	3.32	2.83

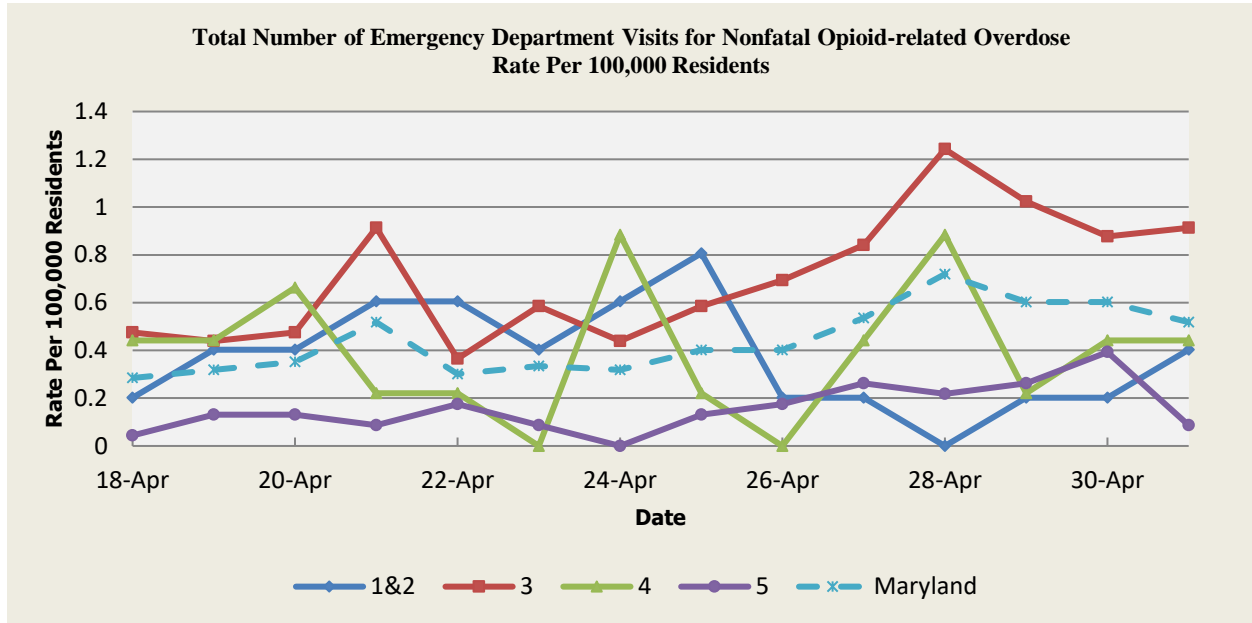

* Per 100,000 Residents

(report continues on next page)

SYNDROMIC OVERDOSE SURVEILLANCE

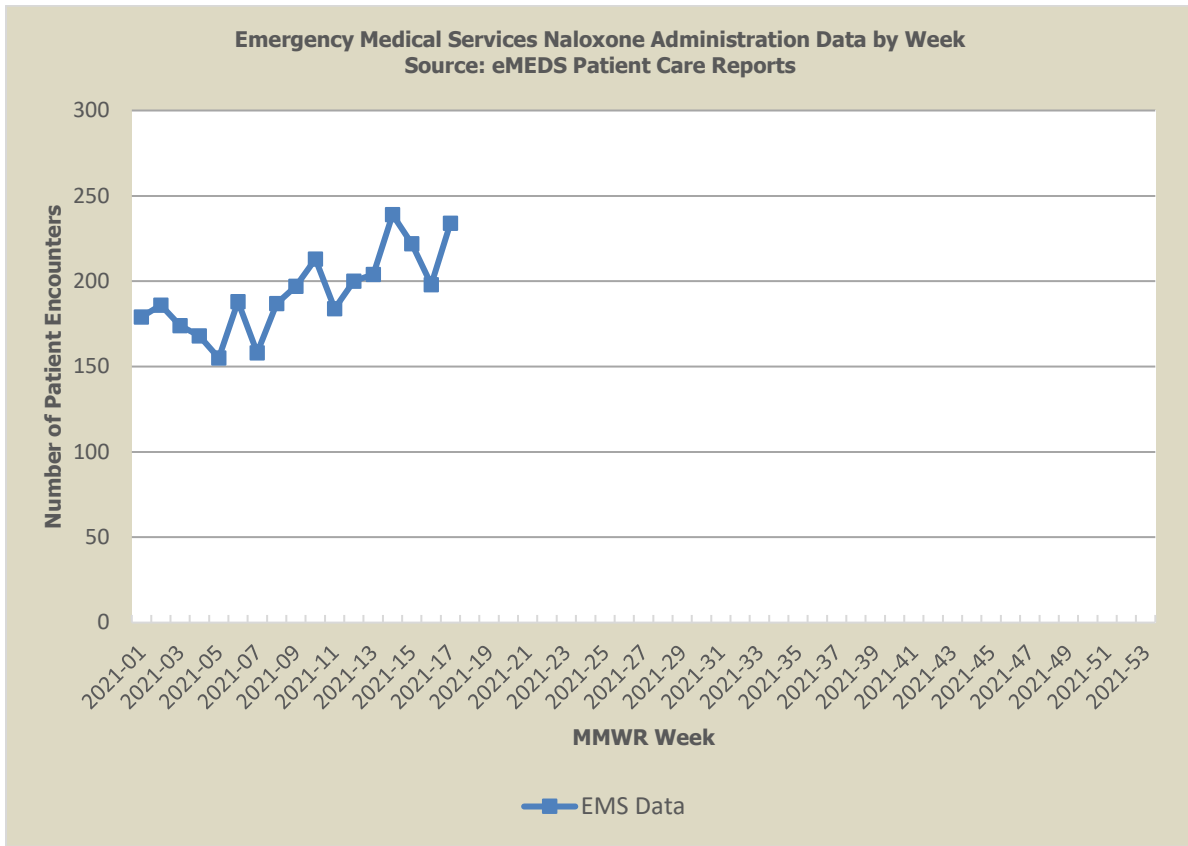

The purpose of this section is to characterize nonfatal overdose trends among Maryland residents captured by ESSENCE data, including emergency department (ED) chief complaint and discharge diagnosis as well as emergency medical services (EMS) patient care reports. Maryland uses ESSENCE data to track trends in nonfatal drug overdoses as a critical strategy for surveillance and tailoring prevention resources to populations most affected in the state.

Nonfatal Opioid-related Overdose

(report continues on next page)

Naloxone Administration Data by Week

Disclaimer on eMEDS naloxone administration related data: These data are based on EMS Pre-hospital care reports where the EMS provider has documented that they administered naloxone. The administration of naloxone is based on the patient’s signs and symptoms and not on any diagnostic tests. These data are reported for trending purposes only.

(report continues on next page)

Naloxone Administration Data

Disclaimer on eMEDS Naloxone administration related data: These data are based on EMS Pre-hospital care reports where the EMS provider has documented that they administered naloxone. The administration of naloxone is based on the patient's signs and symptoms and not on any diagnostic tests. These data are reported for trending purposes only.

PANDEMIC INFLUENZA UPDATE / AVIAN INFLUENZA-RELATED REPORTS

WHO update: The current WHO phase of pandemic alert for avian influenza is ALERT. Currently, the avian influenza H5N1 virus continues to circulate in poultry in some countries, especially in Asia and northeast Africa. This virus continues to cause sporadic human infections with some instances of limited human-to-human transmission among very close contacts. There has been no sustained human-to-human or community-level transmission identified thus far.

Influenza A (H7N9) is one of a subgroup of influenza viruses that normally circulate among birds. Until recently, this virus had not been seen in people. However, human infections have now been detected. Presently, there is limited information about the scope of the disease the virus causes and about the source of exposure. The disease is of concern because most patients have been severely ill. There is no indication thus far that it can be transmitted between people, but both animal-to-human and human-to-human routes of transmission are being actively investigated.

Alert phase: This is the phase when influenza caused by a new subtype has been identified in humans. Increased vigilance and careful risk assessment, at local, national, and global levels are characteristic of this phase. If the risk assessments indicate that the new virus is not developing into a pandemic strain, a de-escalation of activities towards those in the interpandemic phase may occur. As of May 7th, 2021, the WHO-confirmed global total (2003-2020) of human cases of H5N1 avian influenza virus infection stands at 862, of which 455 have been fatal. Thus, the case fatality rate for human H5N1 is approximately 53%.

AVIAN INFLUENZA

AVIAN INFLUENZA (MALI), 5 May 2021, The location of the outbreak can be seen on the interactive map included in the OIE report at the source URL above. Read More:

<https://promedmail.org/promed-post/?id=8345729>

AVIAN INFLUENZA (GERMANY), 3 May 2021, Highly pathogenic influenza A viruses (infection with) (non-poultry including wild birds), Germany. Read More:

<https://promedmail.org/promed-post/?id=8342449>

HUMAN AVIAN INFLUENZA

There were no relevant human avian influenza reports this week

report continues on next page)

NATIONAL DISEASE REPORTS

E. COLI EHEC (WASHINGTON), 6 May 2021, Public Health - Seattle & King County is investigating a cluster of toxic *Escherichia coli* cases that left 7 children infected over a 2-week period. Read More: <https://promedmail.org/promed-post/?id=8346941>

VECTOR MOSQUITO CONTROL (FLORIDA), 5 May 2021, After a decade of fighting for regulatory approval and public acceptance, a biotechnology firm has released genetically engineered mosquitoes into the open air in the United States for the first time. Read More: <https://promedmail.org/promed-post/?id=8346371>

RABIES (MULTISTATE), 4 May 2021, Five people have possibly been exposed to rabies after a raccoon tested positive for the virus this week in the Beauregard community. Read More: <https://promedmail.org/promed-post/?id=8342817>

E. COLI EHEC (USA), 1 May 2021, Federal officials said today [Wed 28 Apr 2021] that they are investigating a new foodborne *E. coli* outbreak, but they have not yet identified a source. Read More: <https://promedmail.org/promed-post/?id=8340139>

HIV (USA), 1 May 2021, An alarmingly high rate of transgender women in major US cities have tested positive for HIV, according to a government study. Read More: <https://promedmail.org/promed-post/?id=8340020>

INTERNATIONAL DISEASE REPORTS

CORONAVIRUS DISEASE 2019 UPDATE (GLOBAL), 5 May 2021, Several variants of SARS-CoV-2 have been emerging across the globe, continuing to threaten efforts to stem the world's worst virus outbreak. Read More: <https://promedmail.org/promed-post/?id=8346370>

Q FEVER (SPAIN), 4 May 2021, At least 5 cases of Q fever have been detected in the Baltzola caves by the Health Department of the Basque Government since last December [2020]. Climbers use the interior of these cavities to train throughout the year. Read More: <https://promedmail.org/promed-post/?id=8343274>

YELLOW FEVER (SANTA CATARINA), 4 May 2021, The Blumenau City Administration, in the Valei do Itajai, confirmed on Thu 28 Apr 2021 the first positive case of yellow fever. Read More: <https://promedmail.org/promed-post/?id=8342968>

EBOLA UPDATE (34): (DEMOCRATIC REPUBLIC OF CONGO), 4 May 2021, The Democratic Republic of Congo on Mon 3 May 2021 declared the end of an Ebola outbreak that infected 12 people in the eastern province of North Kivu and killed 6 of them. Read More: <https://promedmail.org/promed-post/?id=8342814>

RABIES (GHANA), 4 May 2021, 14 people have been diagnosed with rabies infection in Kpone, the municipal capital of the Kpone-Katamanso, Municipality in the Greater Accra Region. Read More: <https://promedmail.org/promed-post/?id=8342811>

OTHER RESOURCES AND ARTICLES OF INTEREST

More information concerning Public Health and Emergency Preparedness can be found at the Office of Preparedness and Response website: <http://preparedness.health.maryland.gov/> or follow us on Facebook at www.facebook.com/MarylandOPR.

More data and information on influenza can be found on the MDH website: <http://phpa.health.maryland.gov/influenza/fluwatch/Pages/Home.aspx>

Please participate in the Maryland Resident Influenza Tracking System (MRITS): <http://flusurvey.health.maryland.gov>

NOTE: This weekly review is a compilation of data from various surveillance systems, interpreted with a focus on a potential BT event. It is not meant to be inclusive of all epidemiology data available, nor is it meant to imply that every activity reported is a definitive BT event. International reports of outbreaks due to organisms on the CDC Critical Biological Agent list will also be reported. While not "secure", please handle this information in a professional manner. Please feel free to distribute within your organization, as you feel appropriate, to other professional staff involved in emergency preparedness and infection control.

For questions about the content of this review or if you have received this and do not wish to receive these weekly notices, please e-mail us. If you have information that is pertinent to this notification process, please send it to us to be included in the routine report.
