

# Weekly Cold-related Illness Surveillance Report

November 24, 2021

Reporting for November 16, 2021, to November 22, 2021

**National Weather Service Forecast:** No current advisories.  
**Wind Chill Advisories Declared During the Previous Week:** 0  
**Total Wind Chill Advisories Declared This Winter:** 0

*Wind Chill is only calculated for temperatures below 50°F and wind speeds above 3 mph*

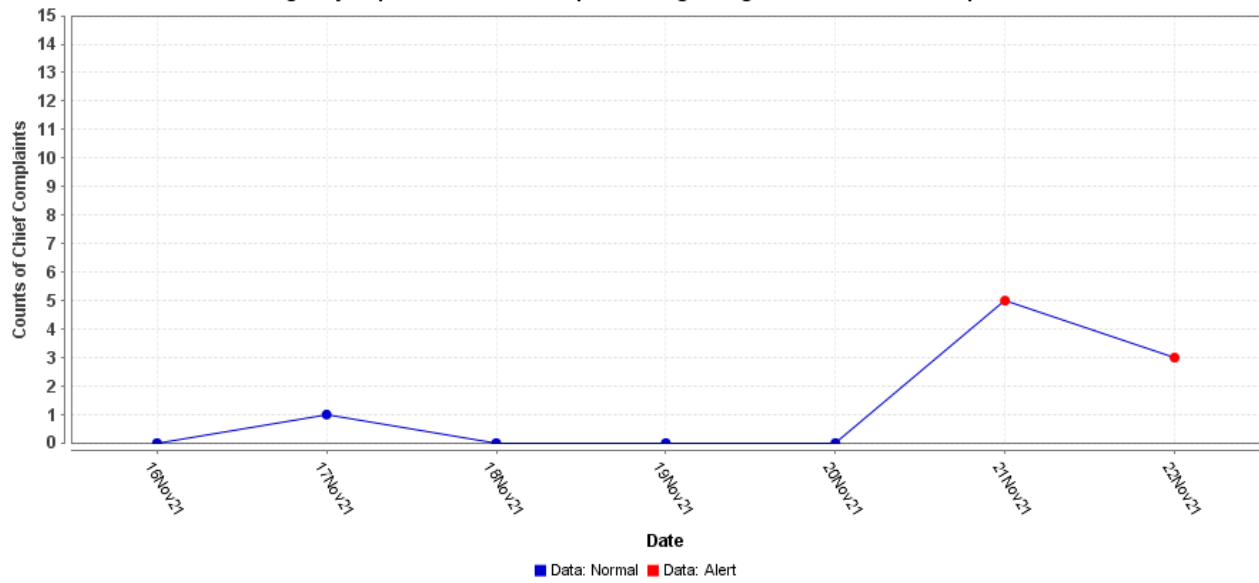

**Note on Emergency Department Data:** The results from the query used in ESSENCE, an electronic biosurveillance system, to track cold-related illnesses may be an overestimation of the actual burden of illness related to the cold weather. This overestimation is due to the nature of the query, which includes the term hypothermia and frostbite. As of November 2019, visit data from 23 urgent care centers are now included in ESSENCE emergency department visit data.

**Note on EMS Data:** These data are based on EMS pre-hospital care reports where the EMS provider has selected hypothermia as a primary or secondary impression of a patient's illness. This impression is solely based on the signs and symptoms seen by the provider, not on any diagnostic tests. Since these numbers do not include all primary or secondary impressions that may be seen with cold exposure, the actual numbers may be low. These data are reported for trending purposes only.

**Emergency Department Chief Complaints Regarding Cold-related Illness**

**Emergency Department Chief Complaints Regarding Carbon Monoxide Exposure**

Date	Number of Chief Complaints Regarding Cold-related Illness	Number of Chief Complaints Regarding Carbon Monoxide Exposure
November 16	2	0
November 17	3	1
November 18	2	0
November 19	4	0
November 20	3	0
November 21	0	5
November 22	2	3

\*Note: ESSENCE chief complaint query for cold-related illness contains the following terms: frostbite, frostnip, hypothermia, chilblain, and trench foot

## Geographical Distribution of Emergency Department Chief Complaints Regarding Cold-related Illnesses for November 16, 2021, to November 22, 2021

*\*Geographical distribution of emergency department chief complaints is based on patients' jurisdictions of residence. The "Other Region" category includes patient records without a ZIP code and patients who reside outside of Maryland.*

*Report continued next page...*

## Age Group Distribution of Emergency Department Chief Complaints Regarding Cold-related Illnesses for November 16, 2021, to November 22, 2021

*Report continued next page...*

Total Number of Cold-related Deaths	Jurisdiction*	Age Group	Gender
0			

*\*Refers to the jurisdiction where the death occurred. \*\*Refers to a newly listed death ^Refers to updated information from OCME*

There were no cold-related deaths reported this week.

There have been no cold-related deaths during this reporting period.

**Wind Chill Advisory/Warning Criteria:** The National Weather Service issues a Wind Chill Advisory for projected wind chill factors of -5°F to -25°F, and a Wind Chill Warning when the projected wind chill is for -25° or less.

**Suspected Homeless Death Data:** Office of the Chief Medical Examiner (OCME) Field Investigators use the U.S. Department of Health and Human Services (HHS) homeless definition to determine suspected homeless deaths. Homeless deaths are listed as suspected due to the limited information available to the Field Investigators at the time of investigation, which may result in some misclassifications.
