CONSENT ORDER

On or about December 6, 2006, the Maryland State Board of Dental Examiners (the "Board"), charged QINGHONG SHI, D.D.S ("Respondent"), license number 13394, under the Maryland Dentistry Act (the "Act"), Md. Health Occ. ("H.O.") Code Ann. §§ 4-101 et seq. (2005). The pertinent provisions of H.O. § 4-315(a), and those under which the Charges were based, provide:

(a) *License to practice dentistry.* – Subject to the hearing provisions of § 4-318 of this subtitle, the Board may deny a general license to practice dentistry...reprimand any licensed dentist, place any licensed dentist on probation, or suspend or revoke the license of any licensed dentist, if the ... licensee:

(6) Practices dentistry in a professionally incompetent manner or in a grossly incompetent manner;

(16) Behaves dishonorably or unprofessionally, or violates a professional code of ethics pertaining to the dentistry profession; and

(28) Except in an emergency life-threatening situation where it is not feasible or practicable, fails to comply with the Centers for Disease Control's guidelines on universal precautions.

As a result of negotiations between the Respondent, by his attorney, Rose Matricciani, Esquire, the Office of the Attorney General, by Kimberly S. Cammarata, Assistant Attorney General, and the Board, the parties agreed to enter into this Consent Order, consisting of Findings of Fact, Conclusions of Law and Order, and with the terms and conditions set forth herein.

FINDINGS OF FACT

1. At all times relevant hereto, the Respondent was and is a dentist licensed to practice dentistry in the State of Maryland.
2. The Respondent practiced dentistry on a commission basis at North Point Dental. North Point Dental is owned by Edward Silverman, D.D.S. and the practice was, at the time of these acts, operated and managed by Susan Himmel, R.D.H.
3. On or about March 8, 2006, the Board received a complaint alleging facts which, if true, would be violations of CDC guidelines. The Board referred the complaint to its investigative unit.
4. On or about April 13, 2006, Board investigators presented to North Point Dental. On this date the Respondent was not present in the operatory.
5. The investigators inspected each operatory in the office, including the operatory where the Respondent was treating patients. Each operatory had dental instruments, both disposable and re-usable, strewn about in drawers, un-bagged. These instruments were not verifiably sterile. The investigation revealed that instruments were not bagged for sterilization or storage after sterilization. The investigators also observed disposable instruments soaking in a cup with a substance later identified as bleach.
6. The investigation further revealed that Dr. Silverman was only present in the office on Mondays and that Ms. Himmel operated and managed the dental office. Ms. Himmel provided the operatories, instruments, dental materials, and all supplies for each practitioner working in the office. It further revealed that Ms. Himmel:

a. Directed all dentists and assistants to re-use disposable, single-use items including: prophylaxis angles, matrix bands, suction tips, etch & bond and wells. Ms. Himmel had been observed taking disposed items from the trash and placing them in operatory drawers and in cups for re-use.

b. Directed all dentists and assistants to dilute Lysol cleaner used for disinfecting contaminated surfaces. The Lysol was diluted with approximately 90% water.

c. Did not purchase adequate quantities of sterilization bags to use for autoclaving instruments. She directed the staff to place instruments directly into the autoclave without bagging. The instruments were run through the autoclave cycle without the use of a chemical indicator strip to evidence that the autoclave reached the necessary temperature to ensure sterility.¹

d. Did not purchase adequate quantities of personal protective apparel.

e. Failed to spore test the autoclave to ensure sterilization of instruments. Evidence revealed that it had been over a year since the autoclave had been spore tested.

7. The Respondent practiced dentistry under those directives.

8. On some occasions, the Respondent's temporary dental assistant did not autoclave his handpieces following patient care. Instead they were wiped down with bleach and used on subsequent patients.

9. The investigators also observed blood-stained waste in regular trash bags in the public dumpster. Other employees advised that they were told not to use the bio-hazardous waste bags too often because of the expense.

¹ The investigators did not observe any sterilizer bags in the operatories or in the sterilization area on the first visit to the office.

10. The investigators also observed food products and dental materials contained in the same refrigerators.

11. The Respondent attempted to seek other employment while at North Point Dental. The Respondent left North Point Dental Care shortly after the Board's inspection. An inspection conducted by a Board-approved consultant of the Respondent's practice at his current practice location revealed significant compliance with CDC guidelines.

CONCLUSIONS OF LAW

Based on the foregoing Findings of Fact, the Board finds that the Respondent violated H.O. § 4-315(a)(6), (16) and (28) which provide:

(6) Practices dentistry in a professionally incompetent manner or in a grossly incompetent manner;

(16) Behaves dishonorably or unprofessionally, or violates a professional code of ethics pertaining to the dentistry profession; and

(28) Except in an emergency life-threatening situation where it is not feasible or practicable, fails to comply with the Centers for Disease Control's guidelines on universal precautions...
