

Quality and Best Practices Work Group Meeting Minutes

Prepared by: Mark Luckner

January 25, 2018

Attendees: Jean-Marie Kelly, Patryce Toyne, Sharon Hobson, Michelle Hinton, Arethusa Kirk, Mark Luckner

Excused: Sharon Morgan, Allison Whiteman Taylor

The purpose of the workgroup meeting was to review the planning grid and set the workgroup's priorities for 2018.

- The **planning grid** is undergoing some revision by the Council Administrators, so we tabled review of the grid until after the 2/5/18 Council meeting (will discuss in the next work group meeting).
- The workgroup agreed that one of its **primary tasks** for 2018 would be to review the School-Based Health Center standards, which are maintained by MSDE, and to make recommendations to MSDE on changes. The standards provide an "operating manual" for SBHCs, but have not been revised since the 1980s. The Council had previously discussed the need to review the standards, but this activity is not currently captured on the planning grid. The grid will be updated to reflect this activity for Quality moving forward.
- The workgroup agreed that its **second priority** for 2018 would be assessing the capacity of SBHCs to collect and report the measures recommended by the national School-Based Health Alliance. The workgroup has representation from two MCOs, and so the overlap/intersection between HEDIS metrics and the Alliance's measures was also discussed. It was also suggested to contact Hayley Love at the Alliance to talk about data support at the national level and best practices for assessment.

The work group will present the 2018 priorities at the next full Council meeting on 2/5/18.
