## Drug- and Alcohol-Related Intoxication Deaths\* in Maryland

## Data update through 1st quarter 2017

This report contains counts of drug- and alcohol-related intoxication deaths\* occurring in Maryland through the 1st quarter of 2017, the most recent period for which preliminary data are available. Counts are also shown for the same period of 2007-2016 to allow for review of trends over time. Counts for 2017 are not complete and are subject to change.

Since an intoxication death may involve more than one substance, counts of deaths related to specific substances do not sum to the total number of deaths.

\*Deaths resulting from recent ingestion or exposure to alcohol or other types of drugs, including heroin, prescription opioids, prescribed and illicit forms of fentanyl, cocaine, benzodiazepines, phencyclidine (PCP), methamphetamines and other prescribed and unprescribed drugs.

Figure 1. Total Number of Unintentional Intoxication Deaths Occurring in Maryland from January-March of Each Year.\*

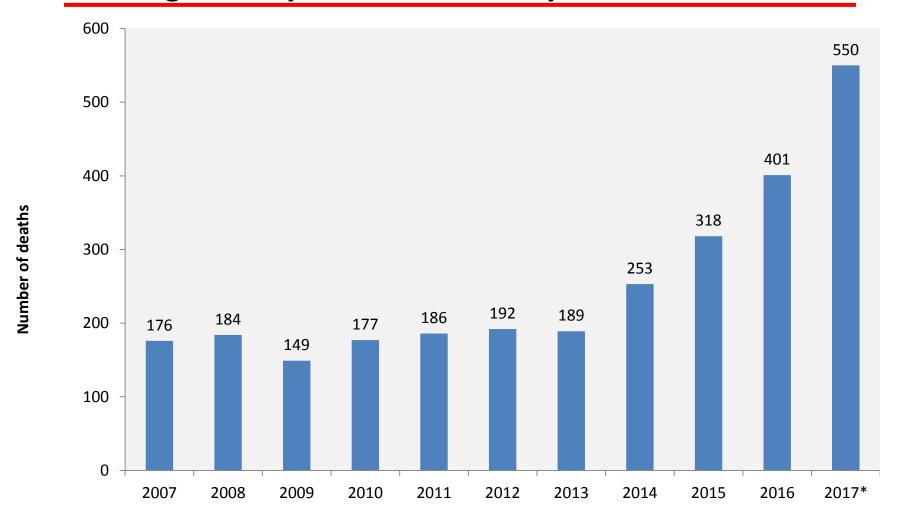

Figure 2. Number of <u>Opioid-Related</u> Deaths Occurring in Maryland from January through March of Each Year.\*

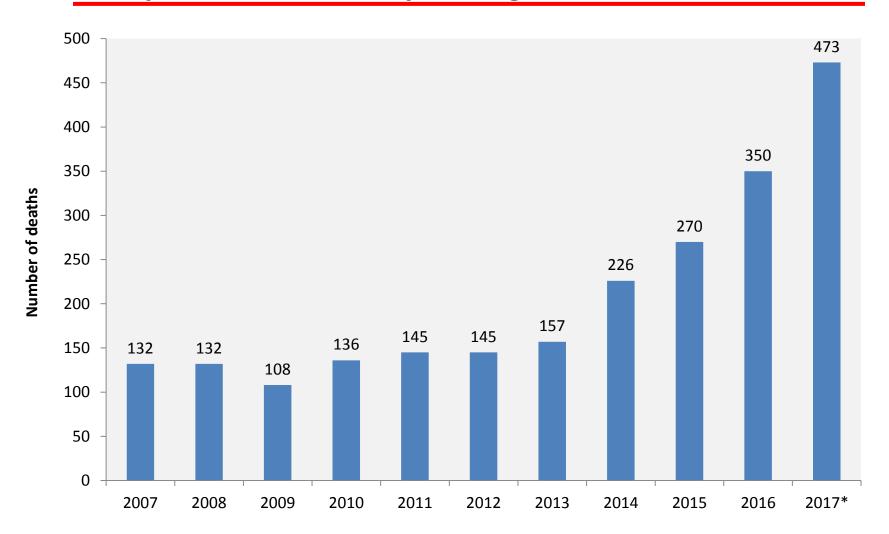

Figure 3. Number of <u>Heroin-Related</u> Deaths Occurring in Maryland from January through March of Each Year.\*

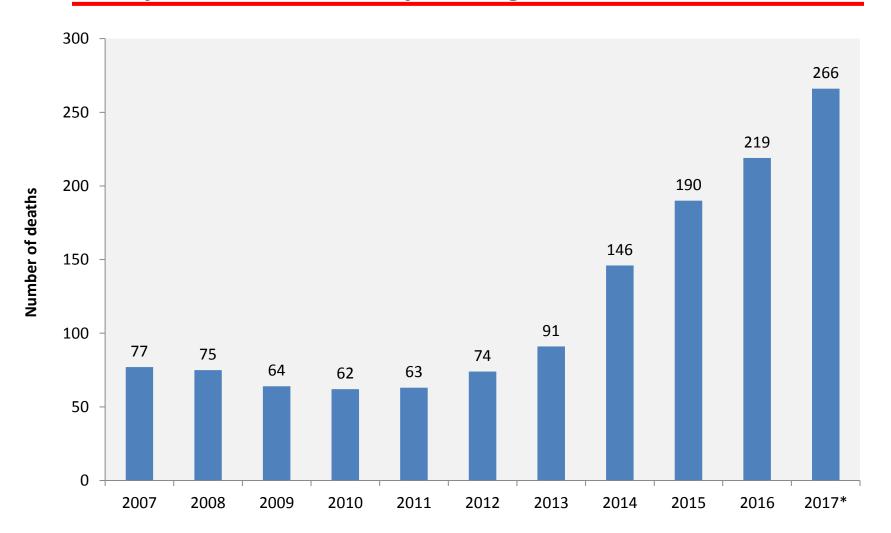

Figure 4. Number of <u>Fentanyl-Related</u> Deaths Occurring in Maryland from January through March of Each Year.\*

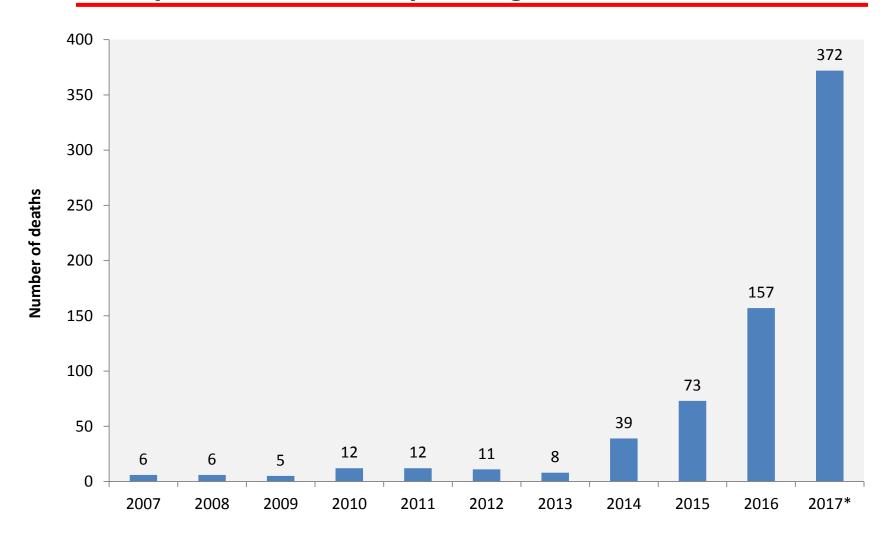

Figure 5. Number of <u>Prescription Opioid-Related</u> Deaths Occurring in Maryland from January through March of Each Year.\*

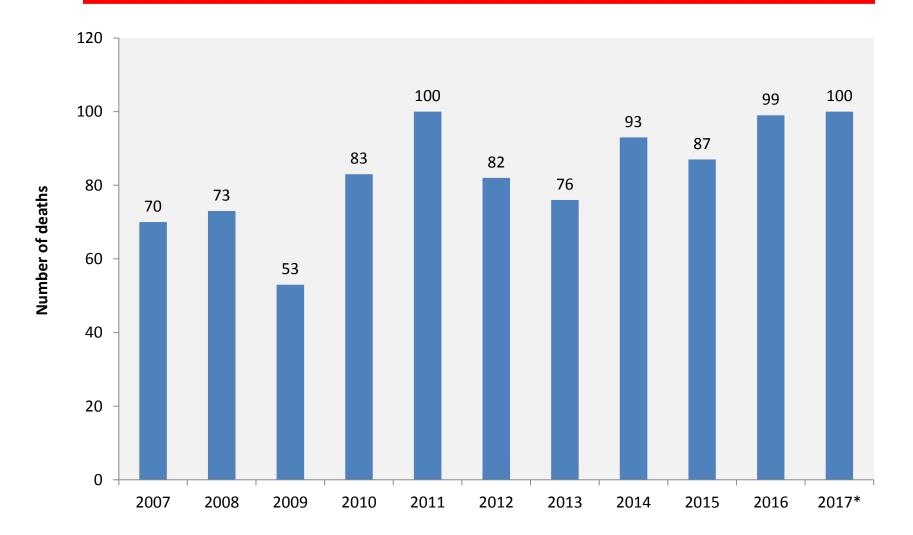

Figure 6. Number of <u>Cocaine-Related</u> Deaths Occurring in Maryland from January through March of Each Year.\*

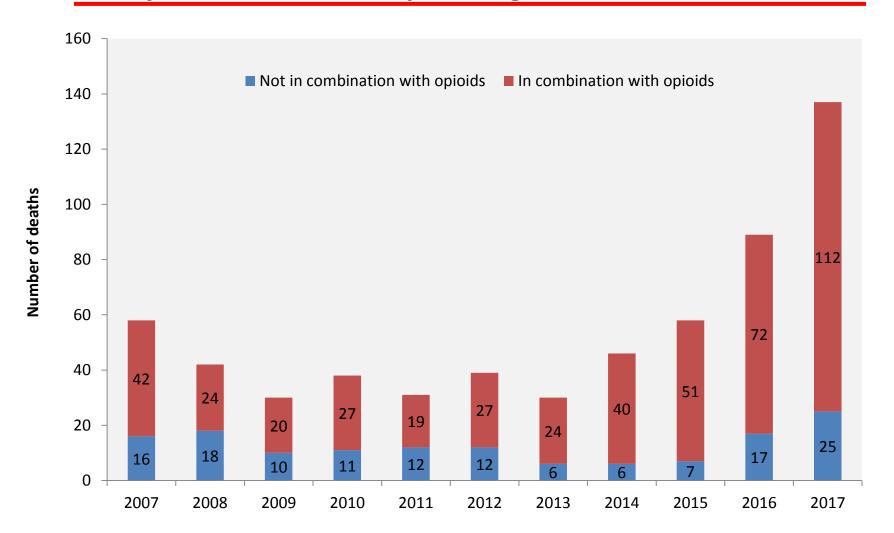

Figure 7. Number of <u>Alcohol-Related</u> Deaths Occurring in Maryland from January through March of Each Year.\*
